

ArXtor lite

INTELLIGENT iSCSI BLU-RAY ARCHIVE LIBRARIES

The DISC ArXtor Lite Series sets a new standard for Blu-ray Archival Storage Systems. Based on DISC's industry proven "touchless" media and reliable robotics technology, the ArXtor Lite Library is an archival storage automation solution for managing 120mm optical media (BD/BDXL/DVD/CD).

Engineered and manufactured in Germany, the ArXtor Lite Libraries are network-attached storage devices, equipped with a web-based user interface to meet the remote management needs of today's demanding IT environments.

An integral iSCSI interface provides a simple, low cost and unifying GigE connection to most network environments, facilitating a standard storage protocol to any Windows and/or Linux system.

The web-based GUI is also available on the front-panel touch display, providing the basis for intuitive local and remote (Java client) setup and diagnostic capabilities, setting a new industry standard for intelligent support of Blu-ray Library systems.

- Long-term Reliability
- Easy to Use & Manage
- Regulatory Compliant
- Lowest TCO
- Green Storage Technology
- Infinite Virtual Capacity

▶ ArXtor LITE FEATURES

- Engineered and Manufactured in Germany
- Patented Touchless 120mm Blu-ray (BD/BDXL/DVD/CD) Media Handling
- iSCSI interface providing simple, low-cost and unifying GigE interface to most network environments, facilitating native storage protocol to any Windows and/or Linux system
- Intelligent front-panel Touch Display and Web-Based GUI (Java)
- Remote Diagnostic and Real-Time BD Drive/Media Monitoring
- Supports Mirroring and Redundant Configurations without additional hardware
- Lowest CAPEX/OPEX Investment of any comparable Archival SAN configuration
- Available in 11U/23U/35U rack-mount and free-standing pedestal configurations
