

DISC Archiving Systems Newsletter

December 2010

Dear Customer and Business Partner,

We are very happy to celebrate a successful business year at DISC Archiving Systems. We are proud to continue the 25 years of supplying reliable German engineered Archive Solutions to our customers.

This year has seen some exciting changes within DISC and with our new headquarters in The Netherlands, the relocation of our development and production facility in Bingen, Germany and the opening of our new headquarters in North-America. This expansion has complemented our existing team and put us in a great position to make 2011 a fantastic year for Archiving.

Next year will bring exciting new developments with the introduction of the 100GB Blu-ray technology combined with the 100 year media life thus providing even greater and more reliable storage capacities.

We would like to invite you to our first major EMEA event of 2011 at the CeBIT fair in Hannover, Germany from 1-5 March, where we will be exhibiting in Hall 2 at booth D47 and would welcome the chance to meet with you and provide information about our latest developments. And for our customers in North-America, we look forward to seeing you in April at the NAB Show (Las Vegas).

We would like to thank you for your support over the past year and greatly appreciate your efforts. We wish you happy holiday seasons and all the best for 2011!

Best regards,
DISC Team

Why choose Optical Archiving?

- **Media Longevity**
Data will be secure for 50-100 years

- **Industry Support**
The Blu-ray Disc Association consists of 180+ members and Blu-ray offers a non-proprietary technology, widely accepted as the successor of DVD

- **Sustainable technology**
Blu-ray media consumes zero power when not being accessed and the energy consumption is low due to shared resources.
